

## NextgenID MBE-Mobile: Smart Card Enrollment JumpKit

The NextgenID® Multimodal Biometric Enrollment (MBE) JumpKit provides a compact, highly mobile smart card enrollment technology for capturing and transmitting high quality digital fingerprints, iris images, face images and all required documents necessary to meet your identity management requirements. NextgenID® MBE-JumpKit is ideally suited for corporate satellite offices, remote government operating sites and autonomous enrollment applications. Completely self-contained the JumpKit includes all of the components necessary to manage specific site enrollments of any size.

In addition to smart card identity information, the JumpKit can be customized to capture information from an individual in order to accomplish various on-site mobile registrations and enrollment activities for businesses, campuses and organizations. As a customizable unit, the kit empowers users to choose exactly what is required for their specific ID management needs, ensuring that all internal and external identity requirements are achieved.

As a rapidly deployable solution, MBE-JumpKit delivers the latest advances in onsite enrollment technology - for use anywhere, anytime, in a small portable form factor.

Delivered in a ruggedized travel case with components designed to withstand the wear and tear associated with global travel, the JumpKit is ideal for use by Large Technology Providers, Government Identity Compliance, Transportation, Education, Energy, Healthcare, Border Security and matters of emergency and crisis management.

The JumpKit provides a mobile and rapidly deployable identification, enrollment and verification station in a easily transportable configuration.

**The MBE-Mobile JumpKit** components will be stored in a Pelican case in custom foam cutouts, and upon arrival, will be unpacked and setup on a table. The case can be set aside until operations are finished. Once completed, the case can be re-packed for storage or deployment at another location.

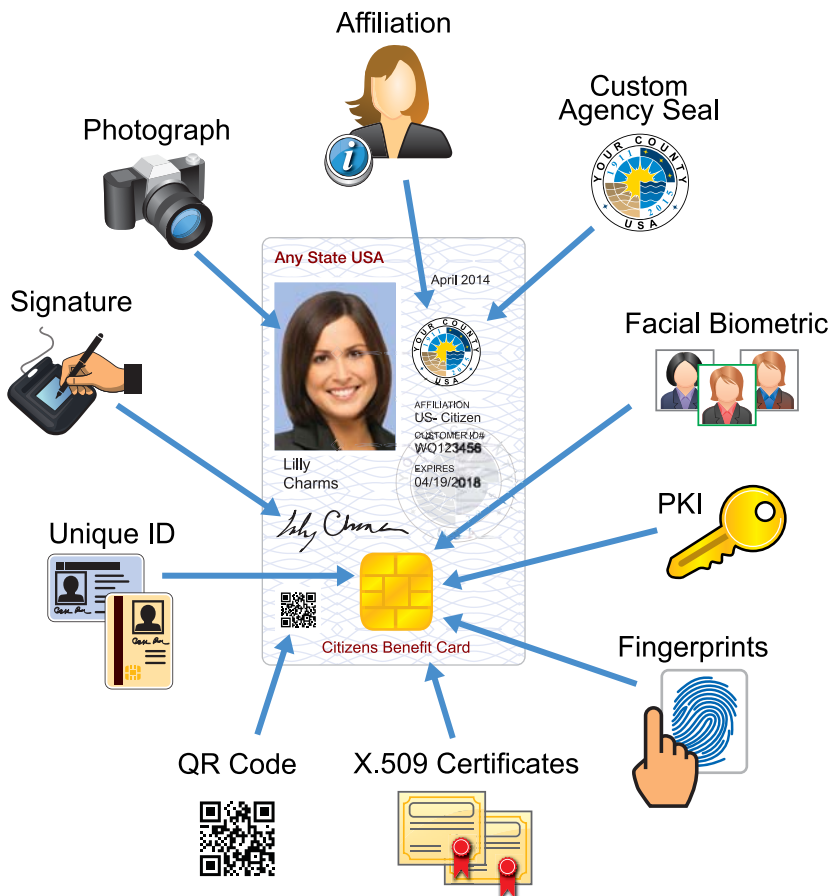

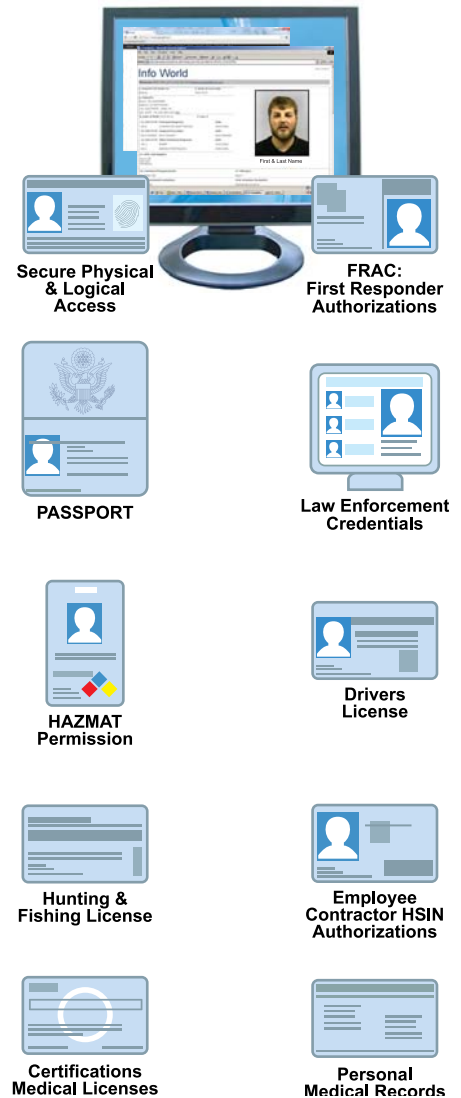

- Carrying Case (Pelican 1510, suited for airline travel as carry-on luggage)
- Dual Fingerprint Sensors
- Face & Iris Camera with Tripod
- Smart Card Reader
- Laptop Computer
- External USB Monitor
- USB 3.0 Hub
- Signature Pad
- Document Scanner
- Drivers License Scanner

\*Data subject to change without notice

The MBE-JumpKit is an automated high speed, touch screen, menu-driven smart card enrollment system specifically designed for the secure capture of multiple biometrics and associated personal identity information as electronic data.

The JumpKit recognizes and captures face, fingerprint, iris, signatures and related “breeder documents” such as driver’s licenses, passports, visas, and travel permits for inclusion into the smart card’s memory. Its unique internal Biometric Image Optimization technology ensures face and document images are captured to ICAO, INCITS and ISO standards.

The JumpKit includes a page scanner for all large breeder documents, such as birth certificates, and can conform to any credential type required to complete an enrollment. All personal information is secured at the time of capture by the JumpKit and formatted to meet customer required interfaces to third party systems.
