

## SOLUTION BRIEF

# Identity Starts Here™

---

## Mobile Identity Portal

# Identity Starts Here™

We believe Identity is a right and requirement, not a privilege. We all have the right to Identify as ourselves and to know the Identity of entities with which we interact – persons, organizations, and devices.

We believe that **Identity Starts Here™** and NextgenID exists to bring our vision to the masses. To the individual, the enterprise, the governments, and to the nations.

To enable every entity to have a unique, non-repudiating, secure, Identity shareable across platforms to authenticate and access benefits and services with lower risk.

# NextgenID, Inc.

NextgenID improves the delivery, adoption, and use of end-to-end trusted Identity & Authentication solutions to government and commercial sectors.

Our catalog of patented hardware and software platform accelerators provides customizable, extensible, future-proof, and standards-compliant solutions enabling the rapid implementation and deployment of identity, authentication, and 3rd-party services for enrollment, proofing, issuance, credentialing, visitor, and access management.

Save on operational expenses, centralize key functions, capitalize on existing PKI, share stakeholder services, enable continuity and flexibility of operations, e.g., COVID-19. NextgenID delivers a robust identity experience from issuance to authentication and access control.

NextgenID, Inc. is a provider of trusted identity assurance, management, and credentialing solutions. The company is privately held with headquarters in Fairfax, Virginia with production support services and R&D based in San Antonio, Texas. Our technologies are patent protected and 100% manufactured in the United States of America. NextgenID is a major contributor to the NIST SP800-63-3 for high assurance identity enrollments, which is now an industry standard. The industry is taking notice as we are now working with some of the largest agencies in the Federal and Defense markets and commercial organizations throughout the world.

## Our Methodology

We use process maturity models across all of our technology development, project management, and business operations for repeatable, scalable, & efficient program execution.

## Our People

Our subject matter experts and identity solutions thought leaders work to bring innovation to the solution designs, align with industry standards, and leverage our patented methods.

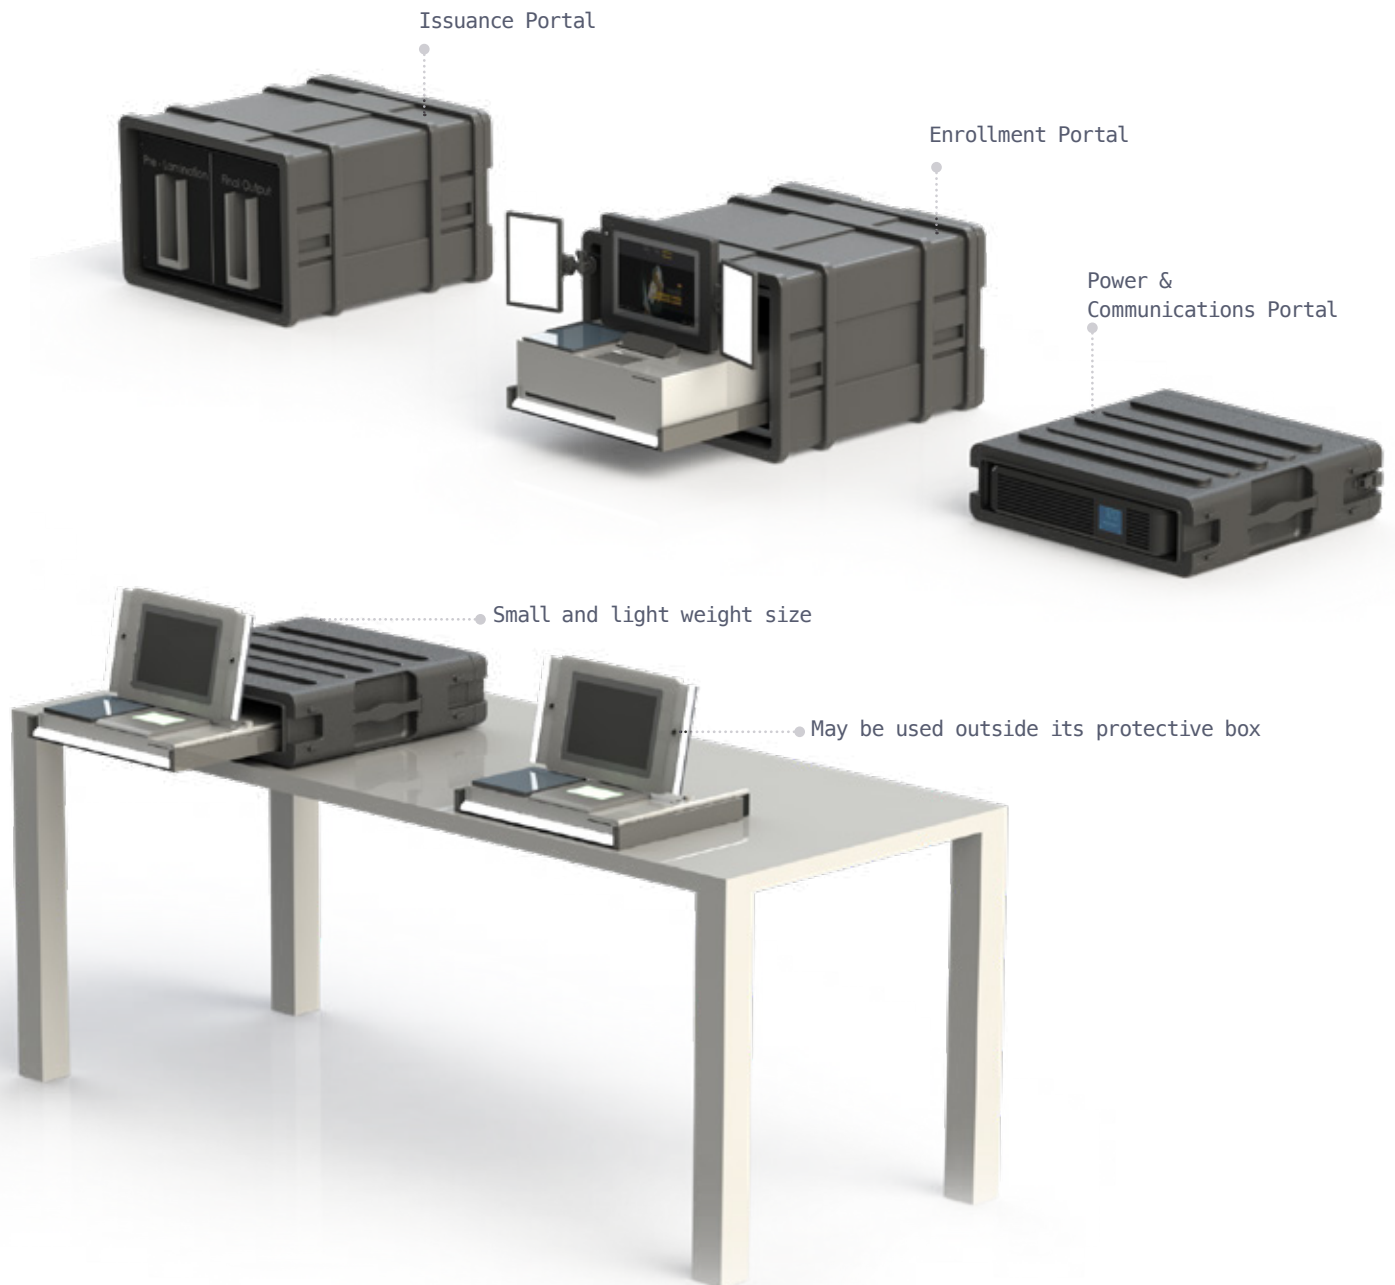

## Our Alliances

We maintain a network of system integrators and technology partners to support the diversity of solution designs and manufacturing partners that facilitate worldwide delivery.

NextgenID's

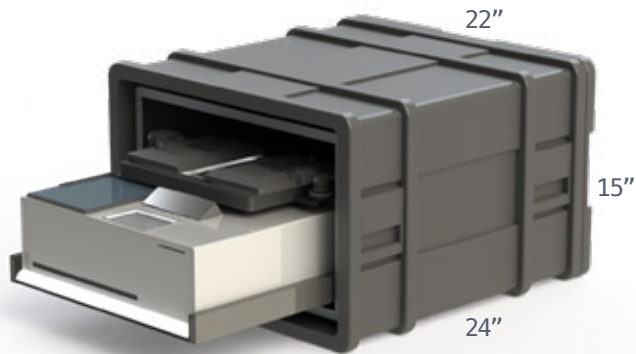

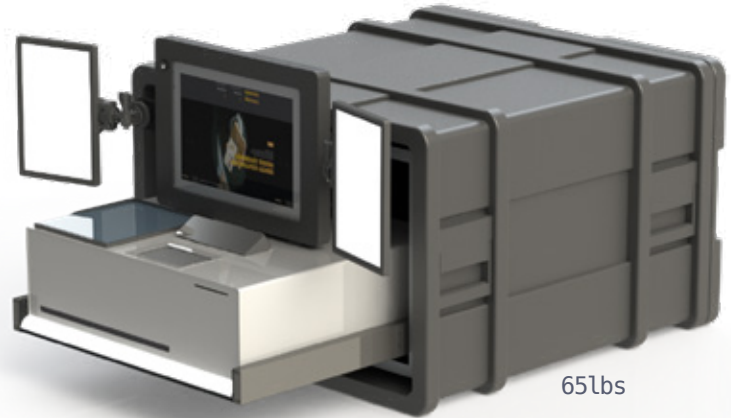

# Mobile Identity Portal

NextgenID's advanced mobile identity portal was designed for ruggedness and portability. Aside from its transportability, light weight and small size; the mobile portal is contained in a shock proof pelican box for field deployments and is capable of being dropped from an airplane or taken out of the box for desktop deployment.

# Mobile Identity Portal

The mobile identity portal comes in multiple configurations and sizes while supporting the full enrollment and proofing requirements of IAL3. Add-on modules support extended battery life, communications, and in-the-field credential issuance.

Each module is self-contained and designed for long-life and minimal setup across a range of operating environments, from field deployments to temporary office space.

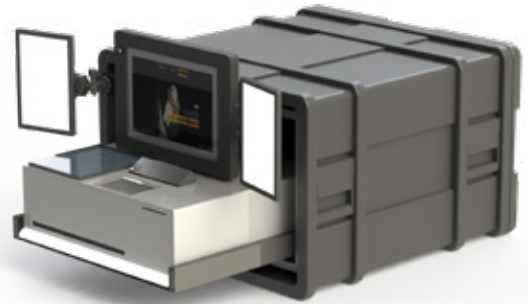

## Mobile Identity Portal Models

Designed to support a wide range of customer requirements, the Mobile Identity Portal family offers a reduced footprint while maintaining the full range of support for all levels of Identity Proofing and enrollment.

### Government Model

Comes with an IRIS Scanner, Passport and ID scanner, 442 Fingerprint scanner, contact/contactless smart card scanner, a full page document scanner, and is capable of ICAO compliant facial capture. All while maintaining the ability to be used with SRIP for remote in-person proofing.

### Base Model

Is a fully customizable line, the shown unit comes with a Passport and ID scanner, contact/contactless smart card scanner, a digital signature pad, and is capable of ICAO compliant facial capture. While also maintaining the ability to be used with SRIP for remote in-person proofing.

### Custom Model

Another example of a customer-defined Mobile Portal configured to contain a dual interface smart card reader, signature pad, and ICAO compliant image capture.

# Advanced Platform Modules

## Supervised Remote In-Person Proofing

Conforms to NIST SP 800-63-3 IAL3 – the highest Identity Assurance Level certified by the U.S. Government

SRIP operators remotely supervise and control the workflow

Local and remote proofing via WebRTC

## Multiple Streams on a Single Portal

Support shared services

Enables multiple applications

100% data segregation

Accelerated web services integration

## Hardware Monitoring Module

Real-time monitoring of system components

Early-warning and diagnostics integration with helpdesk services

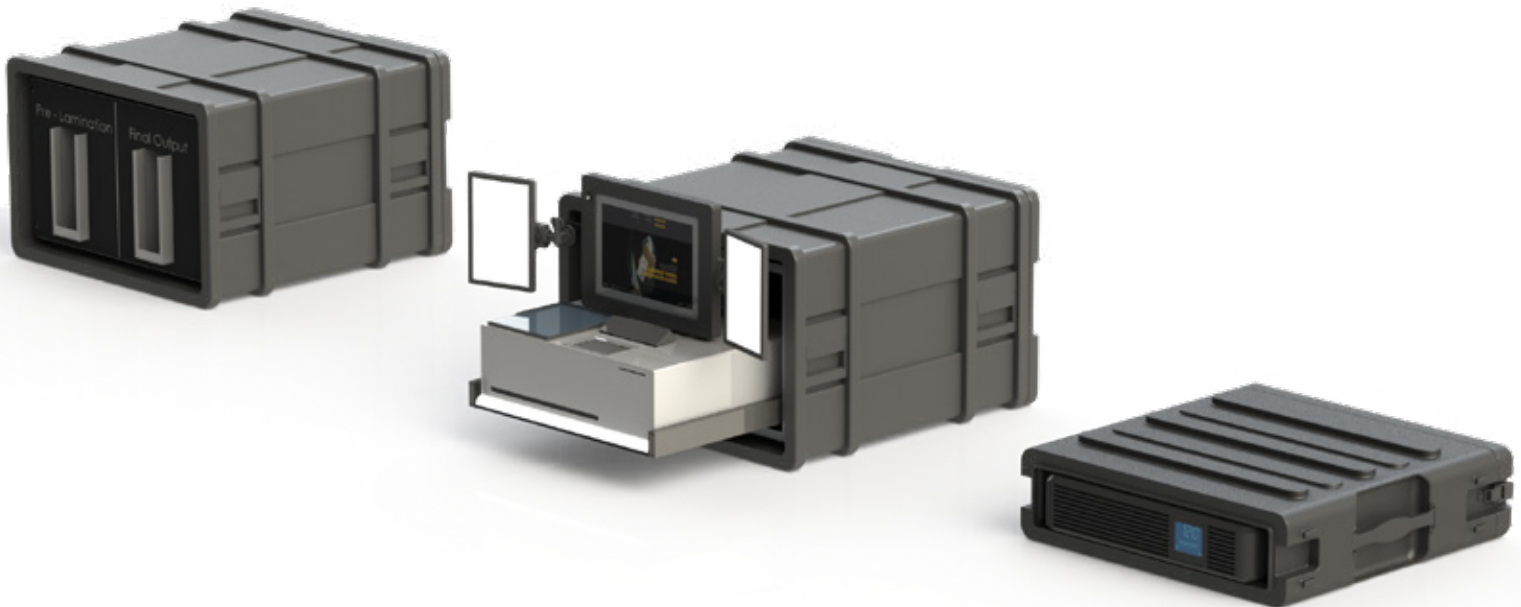

Collects and logs failure metrics and warranty support

## Security Monitoring Module

GPS services track and report on Portal location

Sensors alert for tipping, break-ins, abuse, etc.

Globally map all deployed assets

NextgenID, Inc. is a provider of trusted identity assurance, management and credentialing solutions. The company is privately held with headquarters in Fairfax, Virginia and has production support and R&D based in San Antonio, Texas. Our products are 100% manufactured and made in the United States and patent protected.
